MARKET MONITORING REPORT

Balancing Market

July 2021

ANRE - Romanian Energy Regulatory Authority
HHI - Herfindahl-Hirschman Index
BRP - Balance Responsible Party
BM - Balancing Market
DAM - Day Ahead Market
TSO - Transmission System Operator
DU – Dispatchable Unit
PN – Physical Notification
NDC - National Dispatching Center
C1 – The market share of the largest market participant
C3 – Total market share of top 3 market participants
NPS – Minimum number of residual generators
TTC – Total Transfer Capacity
NTC – Net Transfer Capacity
ATC – Available Transfer Capacity

According to the Commercial Code, Transelectrica, the Romanian Transmission System Operator, operates and monitors the activity of 3 types of markets: Balancing Market, Ancillary Services Market and Market for Allocation of Cross-Border Capacities.

Using the records from the markets data bases, Transelectrica prepares daily, weekly and monthly monitoring reports. A part of the data included in these reports (those data which are not confidential) are published on the website www.transelectrica.ro (section Transparency).

Balancing Market

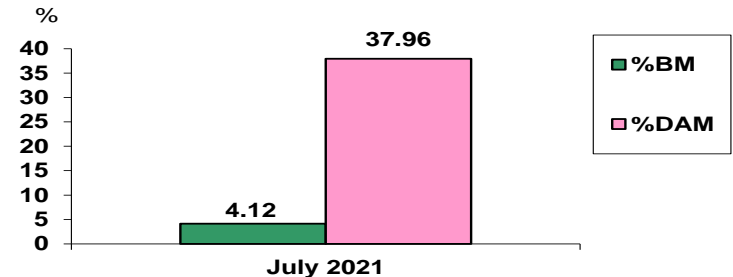

The Balance Generation/Consumption

- The average monthly value of generated power was 6 734 MW and the actual internal gross consumption was 7 042 MW.
- The NDC consumption forecast was close to the actual consumption, the standard deviation being **1.78%**. Bigger differences were registered in case of consumption values resulted as the sum between notified production and total scheduled exchanges with the neighbouring power systems. In this case the standard monthly deviation value was **3.07%**. The greatest daily deviation regarding the notifications was registered on 29th of July 2021 (**7.75%**).
- The energy used in July 2021 for balancing the power system and congestion management was 215 952 MWh (with an average power of 290 MW, which means **4.12%** from the internal gross consumption).
- There were no network congestion management transactions.
- There were no transactions outside BM (with financial compensation).
- The energy used in July 2021 on Day Ahead Market was 1 988 958 MWh (with an average power of 2 673 MW, which means **37.96%** from the internal gross consumption). Data are shown in EET hours.
- The total cost of the energy traded on the Balancing Market was 162 454 427 lei (with an average weighted price of 752.27 lei/MWh).

Balancing Market

The Balance Generation / Consumption

• Monthly percentage values resulted are calculated as ratio between traded volumes on BM / outside BM with financial compensation and gross internal consumption. The annual average value was calculated as average of monthly values.
(BM – Balancing Market, DAM – Day Ahead Market, BM-CG – difference between Balancing Market and traded volume on congestion).

Balancing Market

Balancing energy – Selected prices and quantities

At the beginning of the month on the Balancing Market operated 70 BRPs, 99 market participants, holding 191 commercially operating dispatchable units. Starting with 1st of July 2021, they were removed from the DU list of the Balancing Market TA3 Turceni and TA8 Işalnița production units, as a result of the definitive withdrawal from the operation of the groups. As of 30th of July 2021, IASC production unit was removed from the DU list of the Balancing Market, as a result of the withdrawal of the BMP VEOLIA ENERGIE IASI S.A. (former SC DALKIA TERMO IASI S.A.) (30XRODTIASI ---- W).

Balancing Market

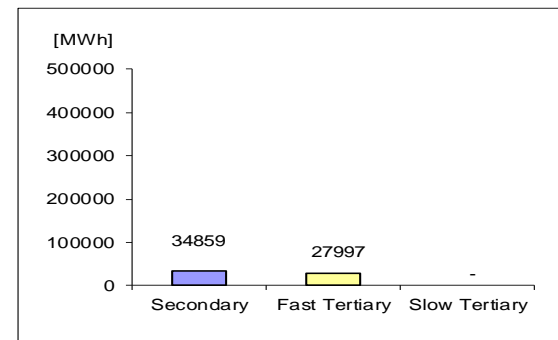

Balancing energy – Selected prices and quantities in July 2021

July 2021

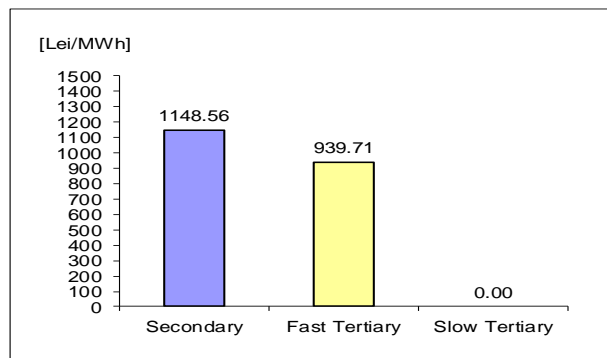

Downward regulation - average price [lei/MWh]

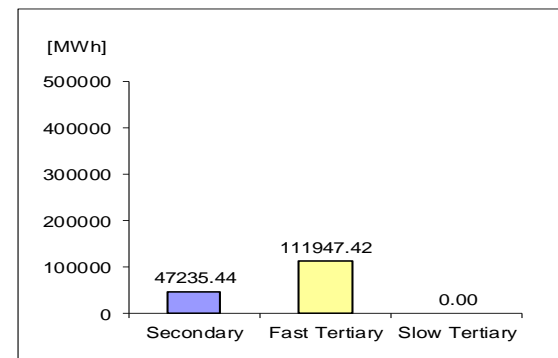

Downward regulation - selected quantities [MWh]

Upward regulation - average price [lei/MWh]

Upward regulation - selected quantities [MWh]

$$\text{Price}_{\text{average weighted, regulation type, direction}} = \frac{\sum (Q_{i,j} * P_{i,j})}{\sum Q_{i,j}}$$

where $Q_{i,j}$, $P_{i,j}$ represents the quantity, respectively the price of the energy selected, corresponding to the selected transaction j in the dispatching interval i .
